

Air 1 serves me in many ways in the local community: 1. Provides family friendly music to me and my family. 2. The music sends a positive message to encourage hope, love, and strength. 3. Informs us on upcoming events to help the community. 4. Provides 24 hour counseling to people who are in need or suicidal. 5. Spreads the gospel of Jesus Christ.

If Air 1 is displaced by a LPFM it would turn kids to other stations who do not promote positive behaviors. This station provides good influences and morals in a society today full of corruption and immorality. The churches would lose a means of communications to its listeners of upcoming events to help the community like feed the hungry, etc. The station provides counseling on marriage, sex, etc. The local community would be limited in listening options due to the frequency of stations

playing the same type of music promoting the same thing.

I think the general public is sick and tired of being bombarded

by advertisers who direct the stations. They promote their message and do little to get involved in the community. The music they play

is violent, foul, and contains sexual content inappropriate for children and offensive to adults. Air 1 promotes equality and is self-funded. It promotes a positive attitude to help the listeners

get involved in their community of addressing serious issues of

homelessness, poverty, drug abuse, etc. The station provides music the whole family can listen creating value to the home. Air 1 has changed the lives of thousands who have turned their lives around it

is a big part of our faith which us to lead better lives and have an effect on the world.
